

BigFix 10 Technology Preview – BigFix Insights

Purpose

- To evaluate customer experience and solicit feedback on the major features of BigFix v10 and to identify possible enhancement areas

When

- January 27 – February 21

Approach

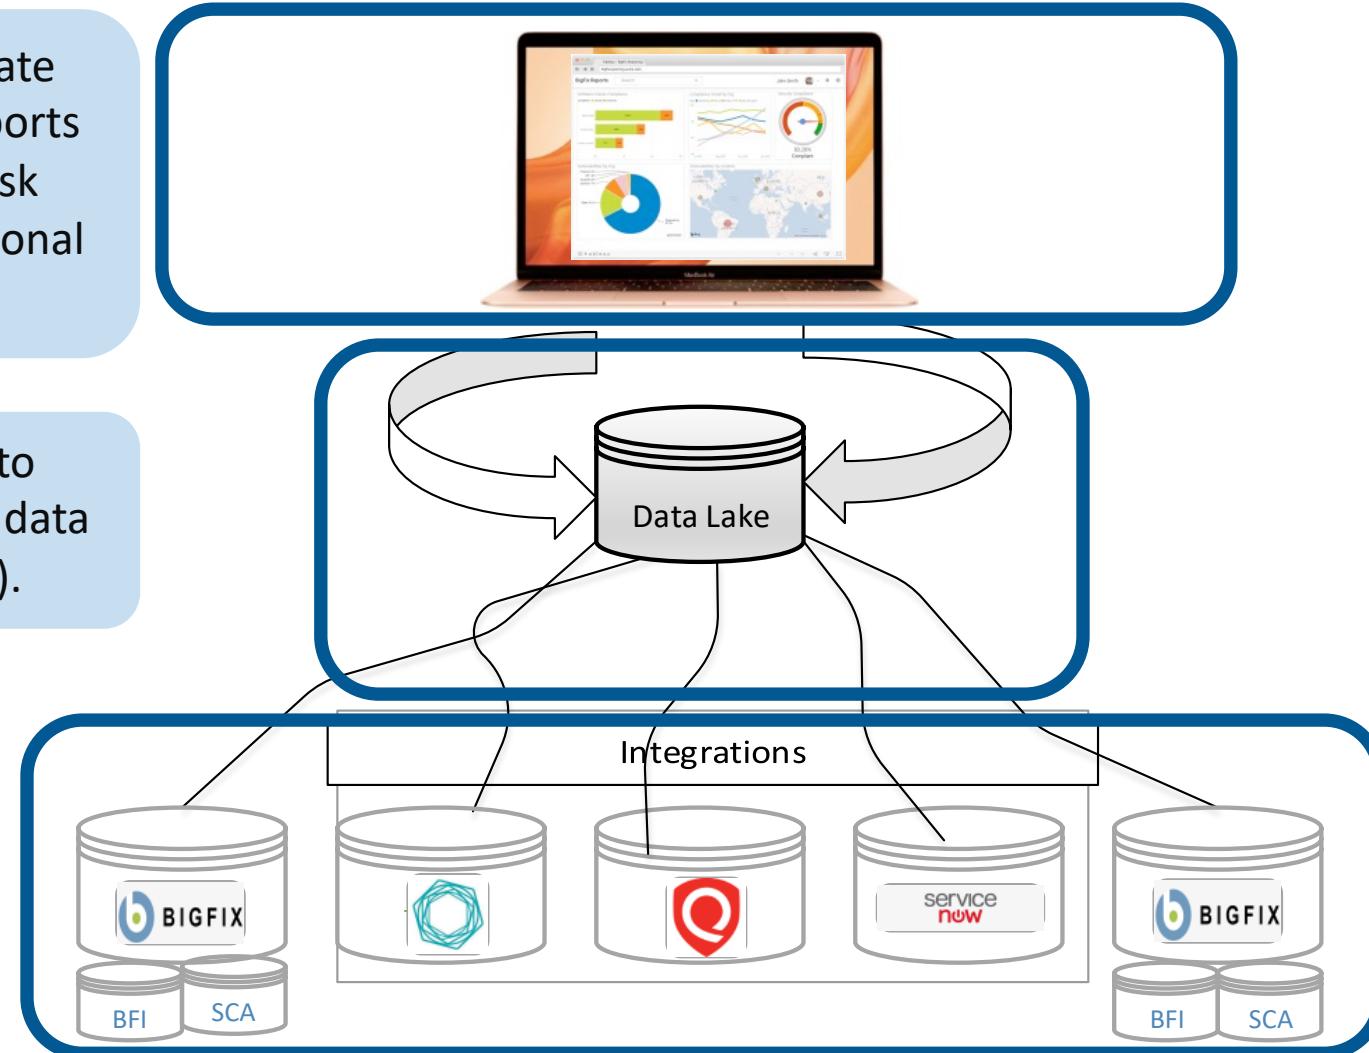

- Your Technology Preview contact will provide you with:
 - A link to a video that gives you an overview of the WebUI Inline Reporting Technology Preview program
 - A slide deck that is used in the video
 - A hosted environment and access credentials
 - A program guide that gives you an overview of all the BigFix 10 Technology Preview
 - A link to the feedback form, to capture and submit your feedback

BigFix Insights

A new module in BigFix 10 to consolidate and correlate data from BigFix and other integrated solutions to gain deep insights into endpoints through reports generated by a BI tool

Leverage BI tool to correlate and produce valuable reports for deeper insights into risk identification and operational efficiency assessment.

A Hybrid Data Repository to ingest data from all BigFix data sources (starting with BFE).

Enable external ingestion of data from third party solutions such as CMDB (Service Now, Vulnerability Scanners, Qualys, Tenable, Rapid 7), and more.

Setup and Administration

One UI to manage all imported data sources

5 Datasources								
BFE1	BFE	192.168.x.x	####	2	Sites	10/20/2019	10/31/2019 11:00	Pause
BFE2	BFE	###.###.#.#	####	5	Sites	10/20/2019	10/31/2019 11:00	Running
BFE3	BFE	###.###.#.#	####	2	Sites	10/20/2019 Last ETL	10/31/2019 11:00	Complete
BFE4	BFE	###.###.#.#	####	3	Sites	10/20/2019	10/31/2019 11:00	Pause
BFE5	BFE	###.###.#.#	####	10	Sites	N/A	10/31/2019 11:00	Running

Clear guide to quickly get users started with using the Data Repository

Setup the BigFix Insights Server

Specify the server you want to host BigFix Insights.

BigFix Insights Server Connection

Server Alias *

Domain

Hostname or IP Address *

Username *

Password *

Authentication

SQL Windows NT

This event repeats Monthly

01 day after Last Wednesday

At 05 : 00 AM UTC

Next ETL 11/28/2019 05:00PM

Last ETL 2 days ago

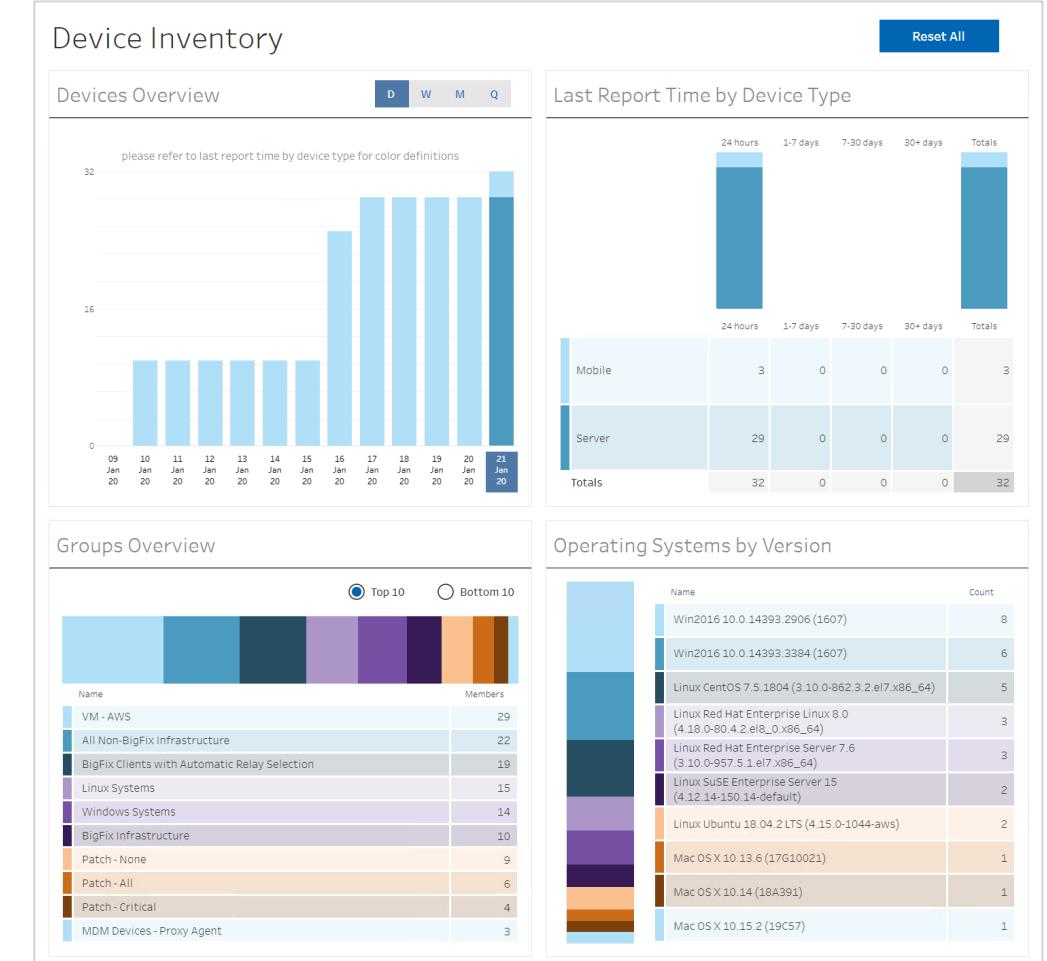

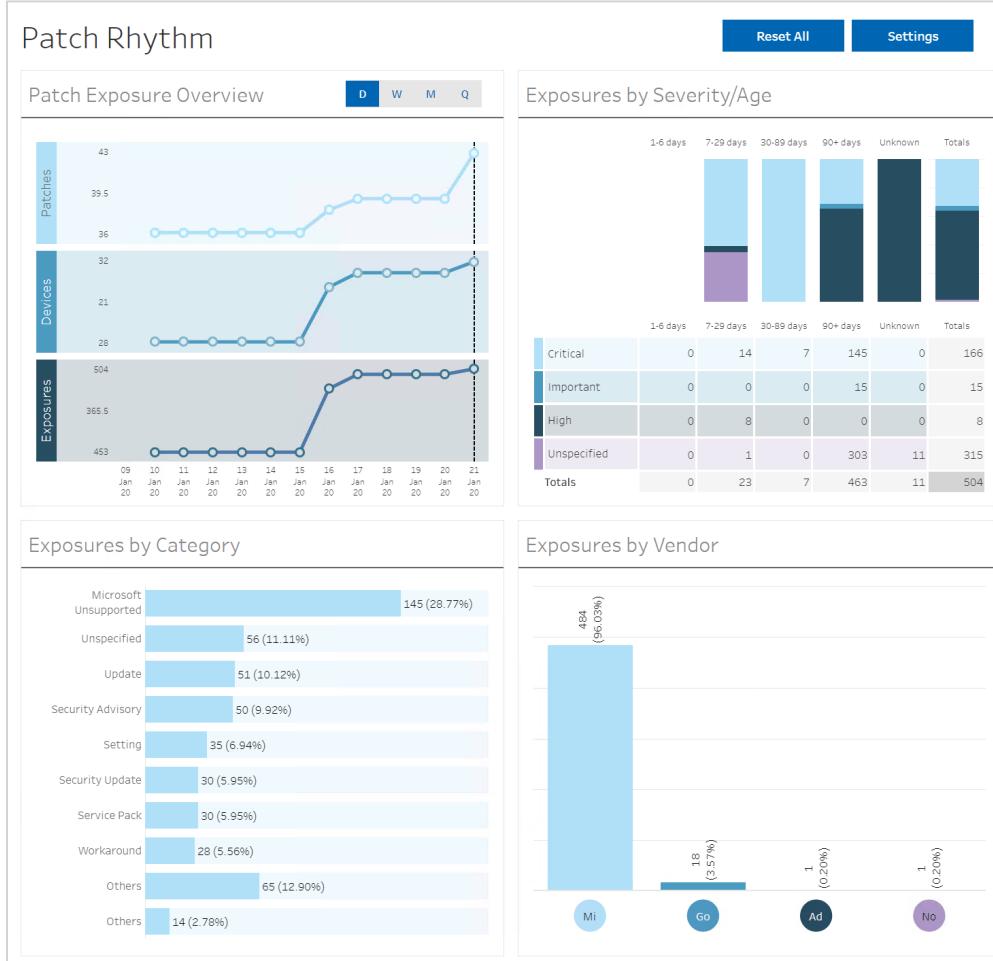

Last ETL duration 189 minutes 45 seconds

Indication of future ETL traffic when creating / editing ETL schedule

Technology Preview: Sample Tableau reports for BigFix Insights

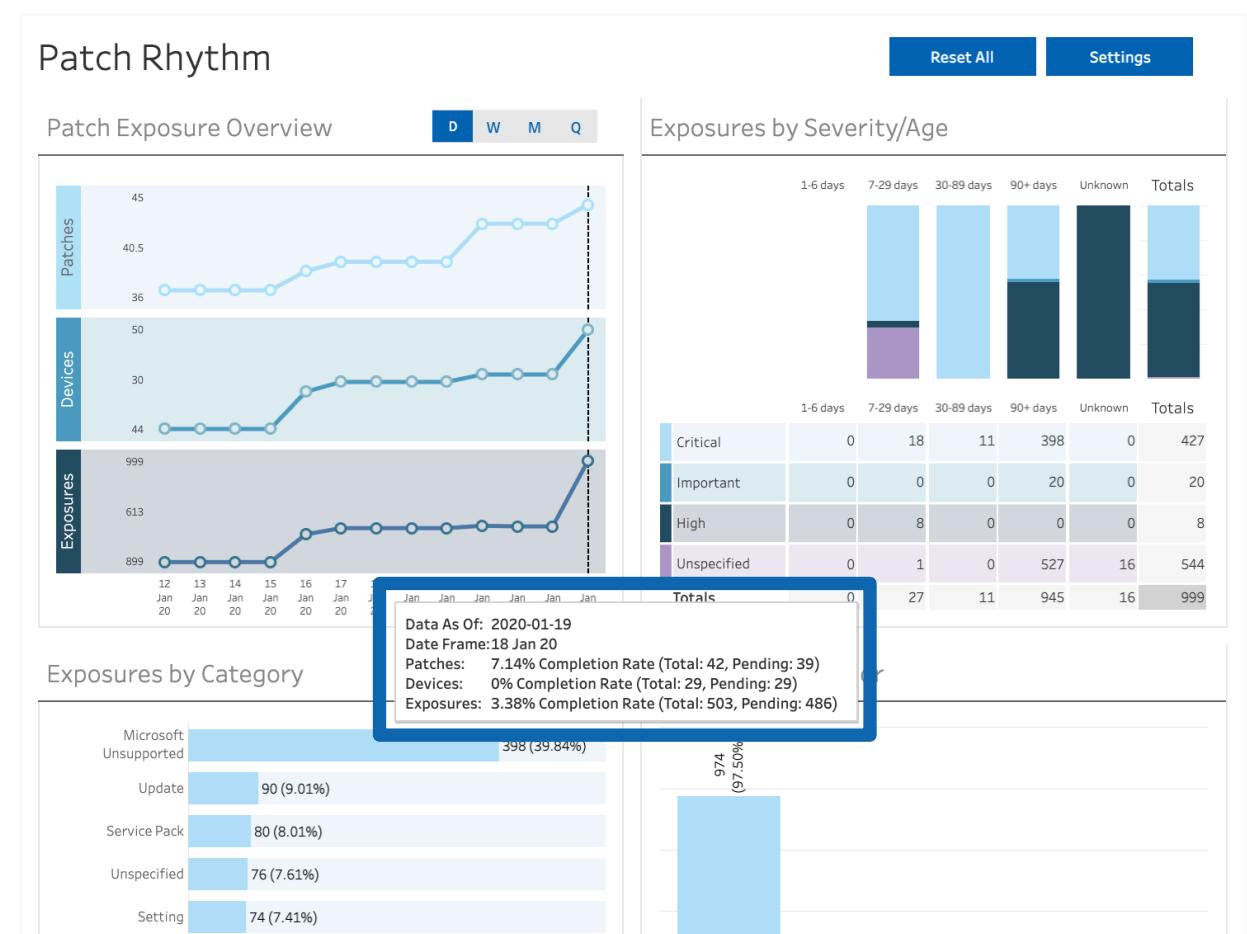

Sample Tableau (BI) reports

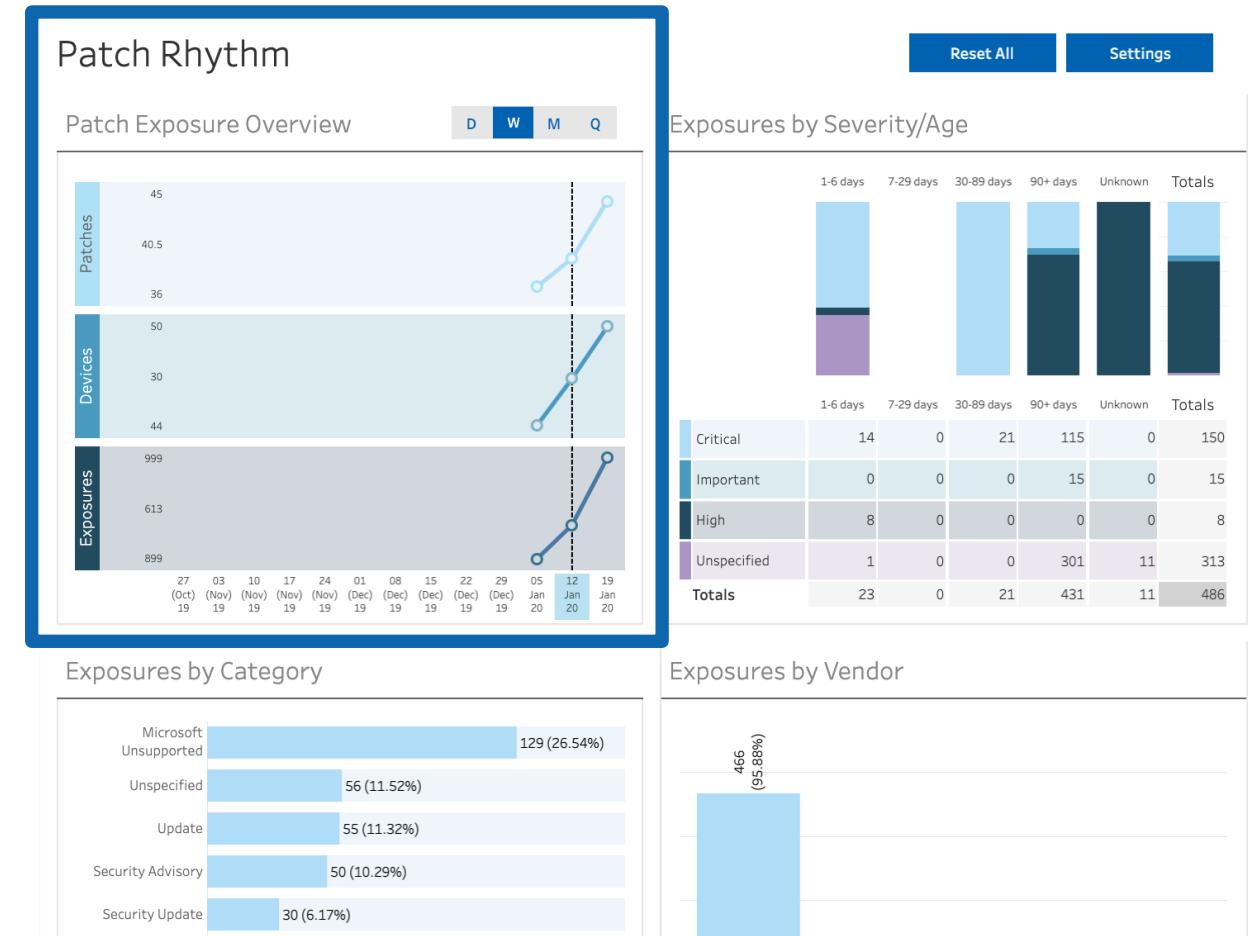

Patch Rhythm, 1-5

1. Log in to Tableau with the user ID and password provided.
2. Review the four Data Visuals (DVs) generated.
3. Mouse over the content to discover additional information.

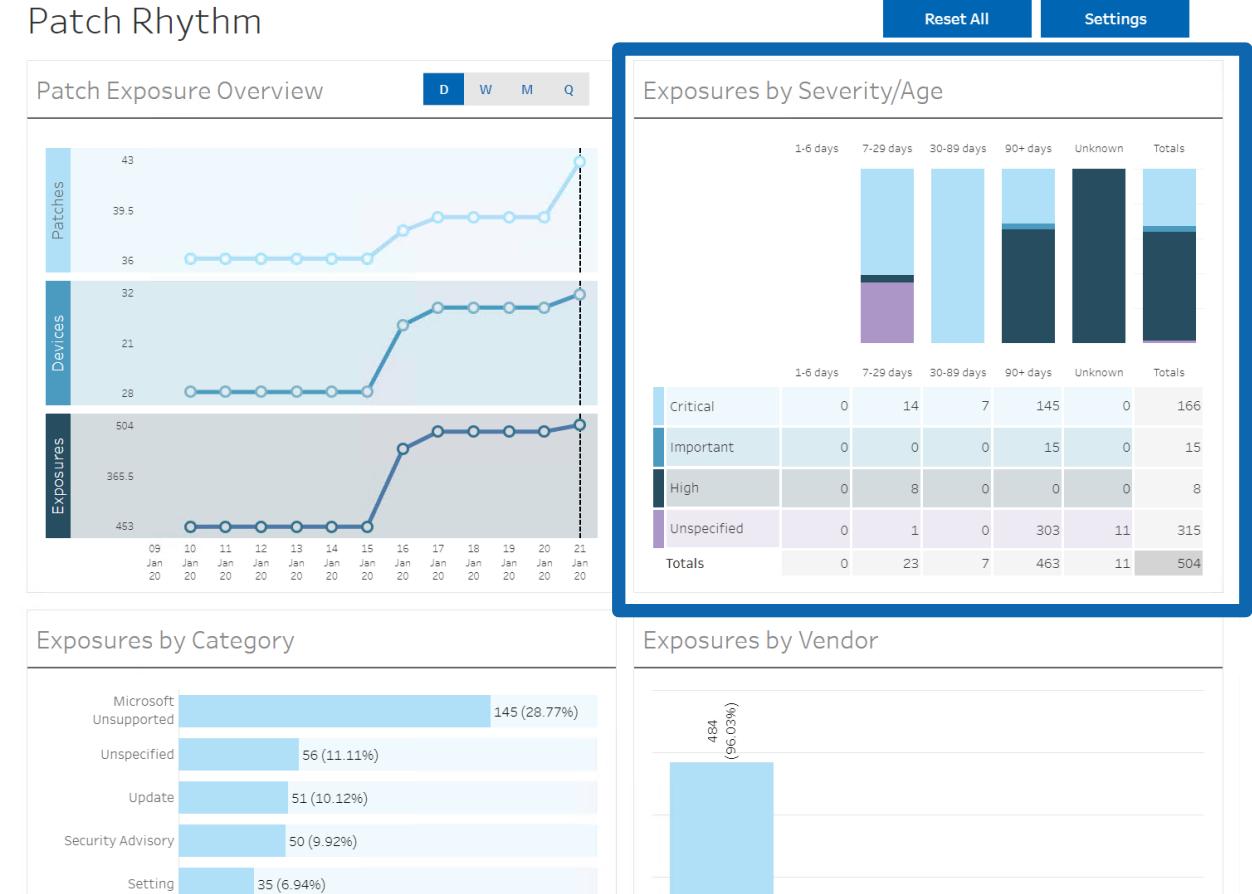

Patch Rhythm, 2-5

1. Change the Patch Exposure frequency.
2. Refine the report, for a specific date.

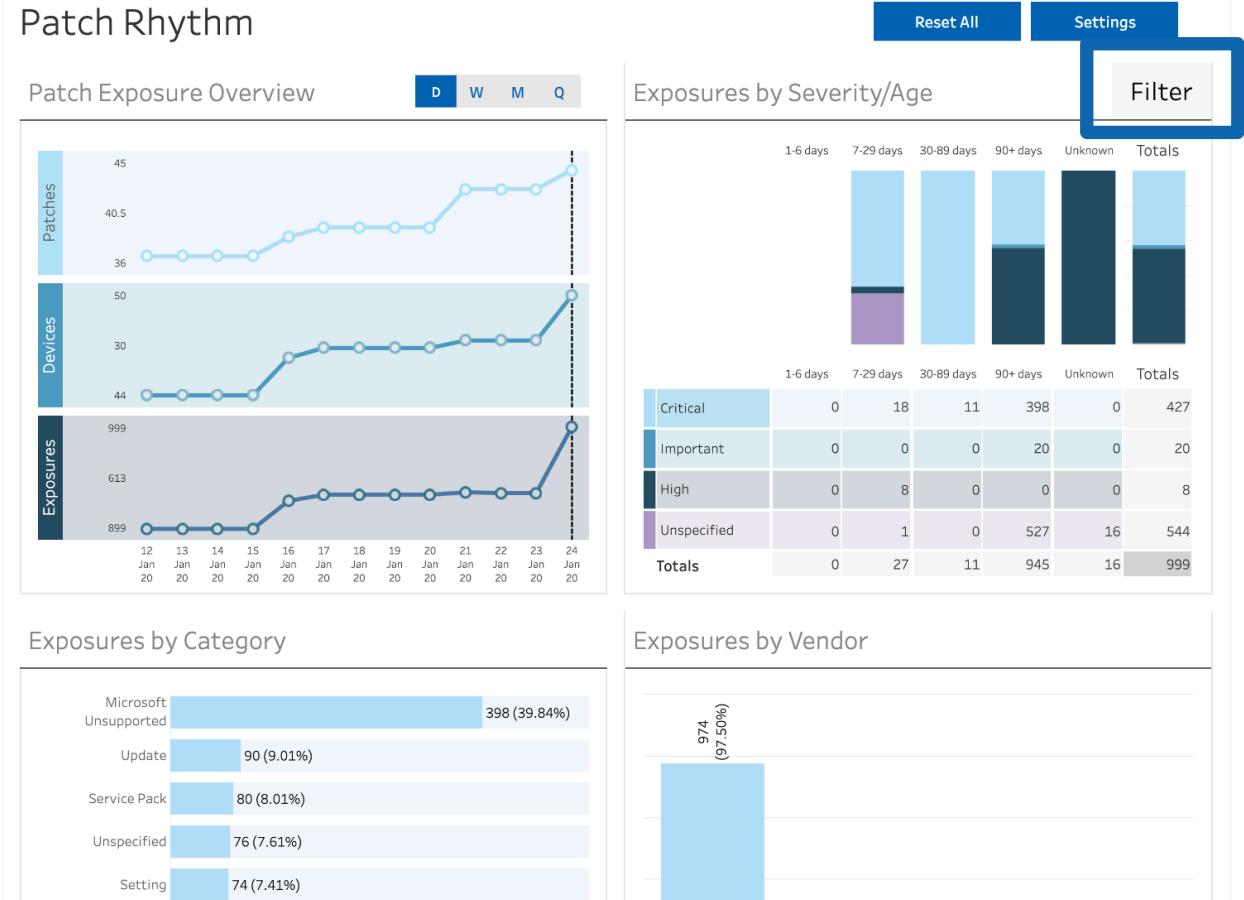

Patch Rhythm, 3-5

1. Reset the report.
2. Refine the report, for a specific severity.
3. Refine the report further, for a specific age.

Patch Rhythm, 3-5

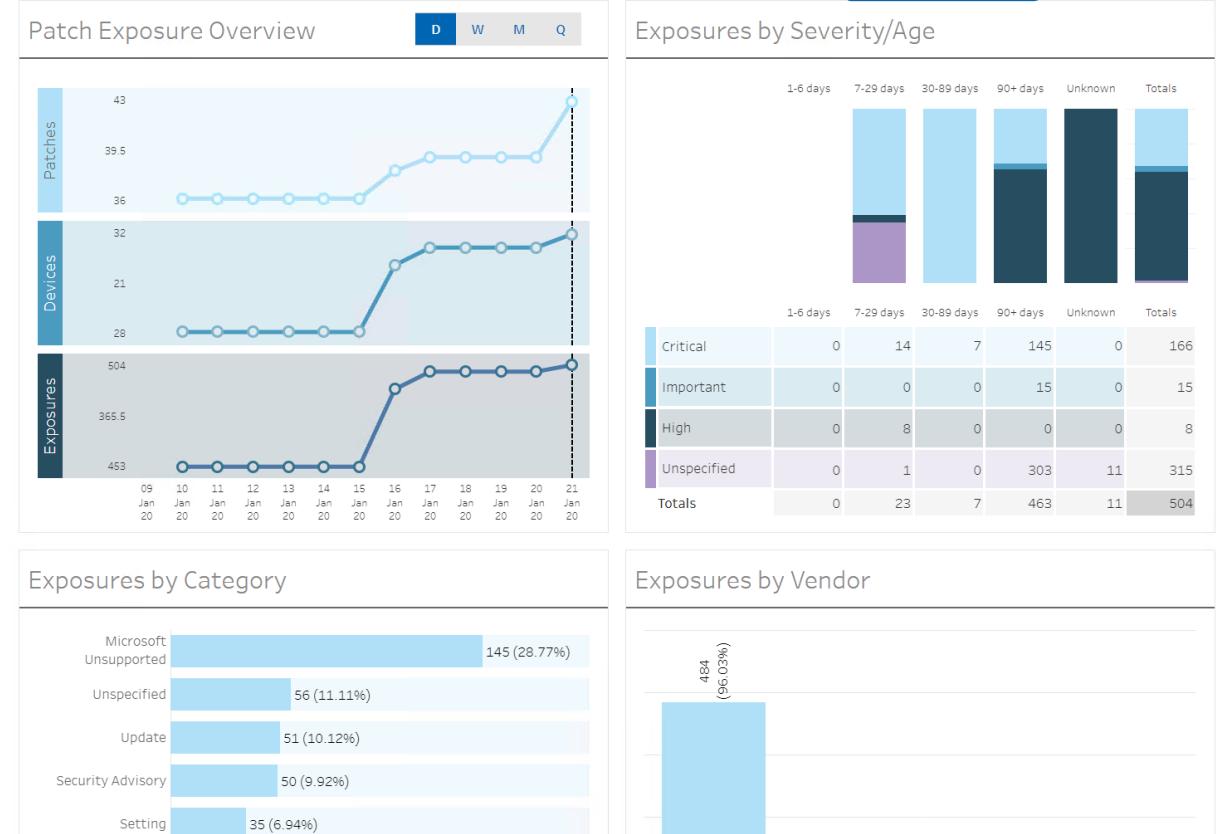

1. Reset the report.
2. Refine the report for a specific severity. After you select an item, the “Filter” button appears. Click “Filter” to confirm and refresh the report.
3. Refine the report further, for a specific age. Hold down CTRL key to select multiple items. Click “Filter” to confirm your selections and refresh the report.

Patch Rhythm, 4-5

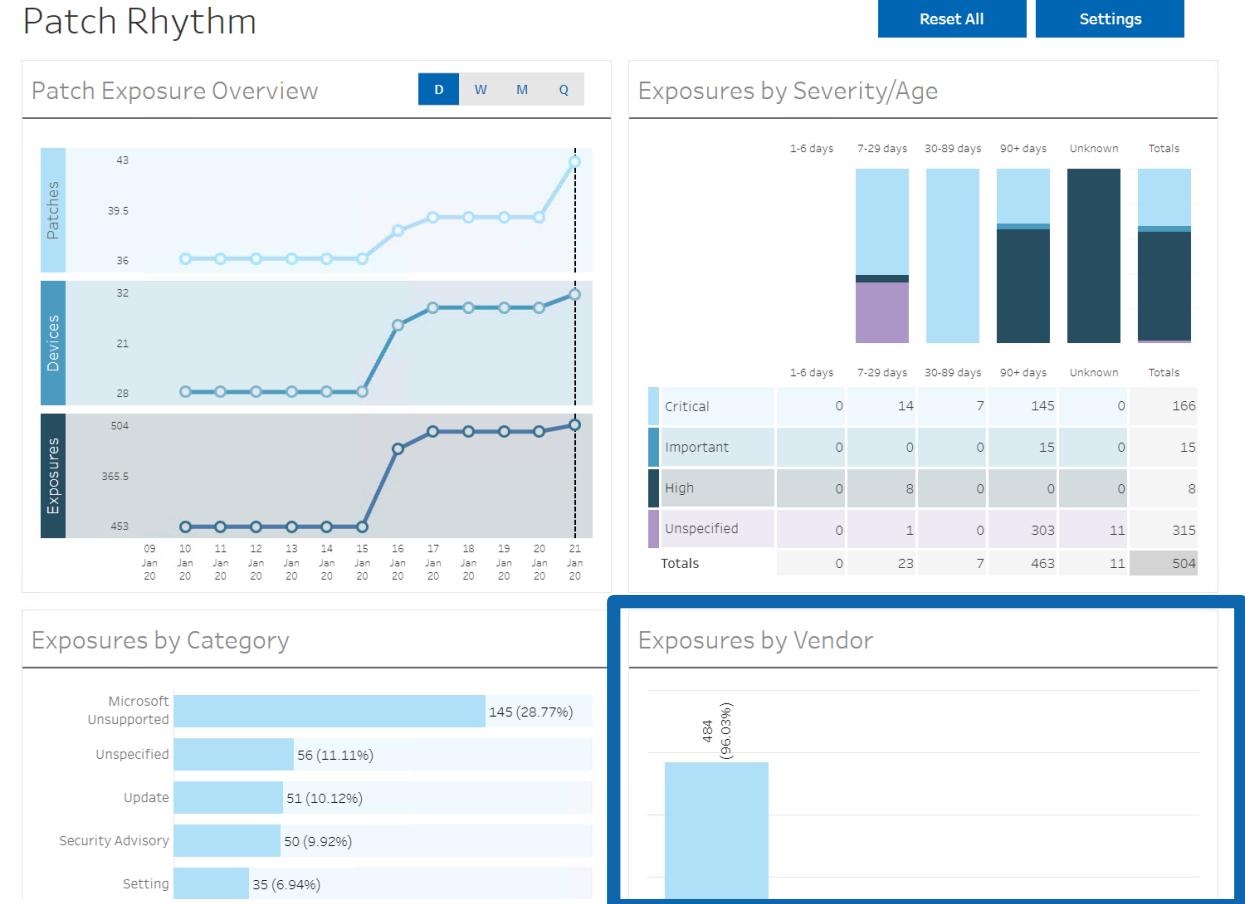

1. Reset the report. Click “Reset All” to reset all your selections across multiple data visuals.
2. Refine the report for a specific category.
3. Refine the report for multiple categories.

Patch Rhythm

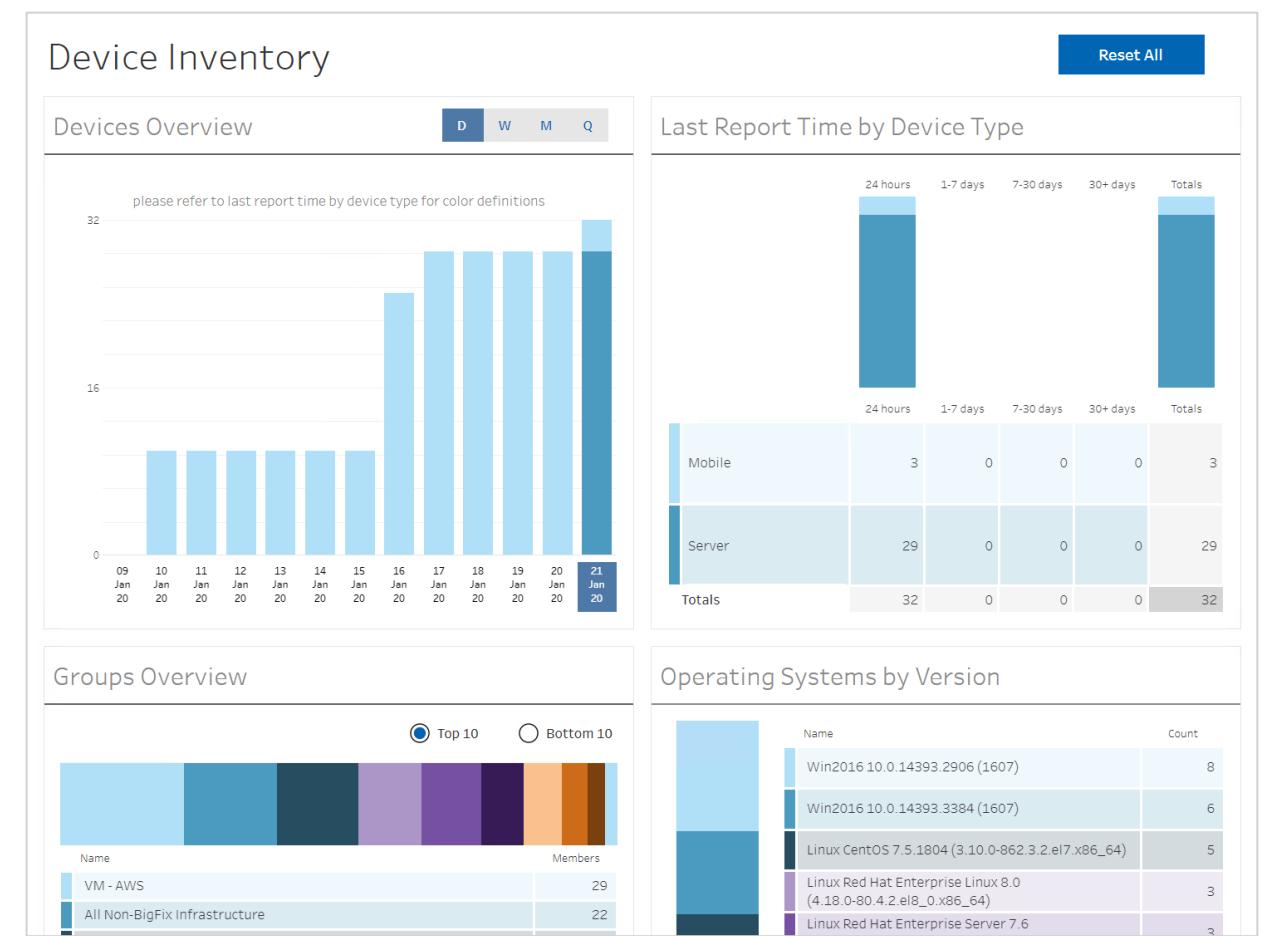

Patch Rhythm, 5-5

1. Reset the report.
2. Refine the report for a specific vendor.
3. Refine the report further, to other attributes in other data visuals such as Severity.

Device Inventory

1. Go to the Device Inventory report.
2. Go through the same scenarios as the Patch Rhythm report.

Survey / Feedback form

Survey/feedback form

[BigFix 10 Technology Review – BigFix Insights survey.](#)

Complete this survey and click **Submit** to send your feedback to us.

Thank you for your participation in making BigFix better! Feel free to contact Liz Thi (elizabeth.thi@hcl.com) with any comments on this process.

BigFix 10 Technology Preview - BigFix Insights

* Required

1. Your contact information *

Please provide your name, your company name, and your email address

Enter your answer

2. What are the sample reports you can utilize right away in your organization?

- Patch Rythm
- Device Inventory

3. For Patch Rythm report, prioritize the value of the Data Visuals provided
